Full Stack Developer working as a Teaching Assistant for the UCLA Coding Bootcamp and looking to pursue a position in Front End Development. Proficient in HTML5, CSS3, Javascript, React, JQuery, Node.js, MySQL, Mongo, Git, and the command line. I am a highly organized multi-tasker with the ability to drive results and meet deadlines in a fast pace work environment.

APPLICATIONS

Capitol Hill

Capitol Hill is an application designed to easily connect people with their Senators and Congressional representatives, and to keep constituents up to date with their representative's legislative actions.

- Front-end developer
- <https://capitol-hill.herokuapp.com>

#Mash

#Mash received 3rd place in the Trilogy Education Staff Hackathon. It is a React project manager for Coding Bootcamp students that uses Github authentication to easily integrate project management with student repositories.

- Front-end developer
- <https://github.com/elthsu/hashmash>

Porsche Specials Tracker

Porsche Specials Tracker is a React application created for a district manager at Porsche to easily track and follow up with the promotions each of his dealerships is currently running by scraping the URLs of each dealership's "specials" page.

- Sole Developer
- <https://porsche-specials-tracker.herokuapp.com/>
